INSTALLATION INSTRUCTIONS
120V LED TAPE

LLI-LAC2.5W
LLI-LAC4.0W

**DANGER: Prior to installation, disconnect power at the source.**

**This product is NOT field-cuttable**

Make sure you have all components listed below:

- LED tape
- Mounting clips or extrusion (optional)
Please read all steps before beginning the installation.

- **DANGER, RISK OF SHOCK:** Prior to installation, disconnect power at the source.

- These products may represent a potential shock or fire hazard if improperly installed or attached in any way. Products should be installed in accordance with these instructions, local electrical codes and the National Electric Code (NEC).

- Do not energize LED tape light when rolled up in its spool.

- Uncoated products are intended for indoor use in dry locations. Coated products are intended for outdoor use or in damp/wet locations. Refer to product spec sheet for location ratings.

- Do not use if there is any damage to the unit or to the wiring/insulation. Inspect periodically.

- Do not route cords or LED tape through walls, doors, windows or any similar part of a building structure.

- Do not secure LED tape or its power cord with staples, nails, or any other sharp objects that may cause damage. Mounting clips are available (sold separately).

- Do not install LED tape closer than 6” to combustible material.

- Ensure applicable wires are in compliance with local codes (In-wall rated, wet-location, high temperature, etc.).

How to Install Tape

STEP 1
Remove the LED tape spool from its package and un-roll the LEDs.

STEP 2
Measure the location where the LED tape will be placed and align the mounting clips. Screw the mounting clips in place.

STEP 3
Push the LED tape into the mounting clips. Make sure the tape is fully inserted.

STEP 4
Plug the LED tape into a 120VAC receptacle.
